

UNIVERGE® SV8100 Communications Server

Fulfilling the promise of UNIVERGE®360

Business today demands efficient, seamless communication that facilitates rapid decision-making and customer responsiveness. UNIVERGE 360 is NEC's approach to help businesses succeed at this accelerated level.

The foundation of UNIVERGE360 is a Unified Infrastructure. The UNIVERGE SV8100 Communications Server is a key component of this foundation and is the ideal system for businesses that wish to compete and grow over time. This robust, feature-rich solution is completely scalable and can be expanded to meet your communications needs both now and in the future.

Scalable to Assist Growing Businesses

The SV8100 functions alone or in a network and can expand to meet your business communication needs, including mission-critical data applications.

At a Glance

- Scalable to assist growing businesses
- VoIP and traditional voice support
- Enhanced centralized management
- Investment protection
- Productivity enhancement
- Diverse features and applications

VoIP and Traditional Voice Support

This system enables you to deploy a pure IP solution or any combination of IP and traditional circuit-switched technology so you can customize the best communications solution for your business.

Enhanced Centralized Management

The SV8100 offers centralized management of phones, data systems and platforms. Moves, adds and changes of SV8100 phones are quick and easy. You can simply plug any phone into any jack wherever it's needed.

Investment Protection

The SV8100 protects your technology investments while providing a migration path to pure IP. Its flexibility supports existing traditional circuit-switched technology and can be fully utilized to run in a pure IP environment.

Productivity Enhancement

Designed to be both versatile and scalable for your growing business needs, the SV8100 supports IP, TDM video, wired or wireless. Its resources and features can be transparently shared between branches or remote locations by networking SV8100s, which provides a lower total cost of ownership.

Diverse Features and Applications

The SV8100 streamlines communication for the entire organization with its diverse suite of features and applications. It enables individuals, departments and locations to work more efficiently by ensuring seamless internal and external communications.

A wide range of on-board applications and high-powered features can be transparently shared between branches or remote locations. The following applications are embedded in the SV8100 for simplified license activation:

- UNIVERGE SV8000 Series Automatic Call Distribution (ACD)
- UNIVERGE SV8000 Series InMail
- UNIVERGE SV8000 Series Hospitality Management Solution

Additionally, the following applications are compatible with the SV8100:

- **UNIVERGE SV8100 Series Desktop Suite** – Enables users to manage their communications more effectively
- **UNIVERGE Desktop IP and Digital Terminals** – Offer the ability for users to communicate while away from their desks
- **UNIVERGE DECT IP and Digital Terminals** – provide convenient, cost-effective mobility
- **UNIVERGE SV8000 Series PC Pro/WebPro** – Provides centralized online HTML-based programming access

The SV8100 provides converged communications – data, multimedia and voice – over one network. Up to sixteen sites can be seamlessly linked to share resources and features. Furthermore, its compatibility with UC for Business provides employees access to information that produces faster decision making and more efficient communication. And the SV8100 can easily be linked with other NEC telephony devices such as:

- UNIVERGE SV8300 Communications Server
- UNIVERGE SV7000 Communications Server
- NEAX® platforms

Whether you are a small or medium-sized business, NEC's UNIVERGE SV8100 Communications Server provides the scalability and flexibility to meet all of your communication needs.

UNIVERGE360 is NEC's approach to unifying business communications. It places people at the center of communications and delivers on an organization's needs by uniting infrastructure, communications and business.
